

COMPANY PROFILE

**"We Are Providing
For Your Business"**

ABOUT US

YCH Group Co., Ltd. – Blister Packaging Machine Specialist

Founded in 2010 in an 8×8 m shop with five staff and one goal: **"to build Thailand's most trusted blister packaging machines."**

We design and manufacture blister and thermoforming systems for pharmaceuticals, medical devices, food, cosmetics, and industrial products. YCH has delivered 200+ machines across Thailand and overseas (Korea, Egypt, Tanzania, Vietnam, ASEAN).

What drives us: **Precision engineering • Customer-specific customization • Continuous innovation • Reliable after-sales.**

With 15+ years of hands-on building, we're a true manufacturer—own design, machining, assembly, automation, and QC. We develop our own controls, HMIs, format molds, and sealing technologies to meet EU-GMP, ISO, FDA 21 CFR Part 11, EU Machinery Directive and cleanroom standards.

Now headquartered in a 3,200 m² facility with expanded capacity, YCH is ready for its next chapter: **"Global expansion with a Thai-made heart."**

OUR SERVICES

01

PHARMACEUTICAL BLISTER

Balcony-type ALU-ALU & ALU-PVC lines for tablets/capsules. Validated sealing, in-line vision/leak tests, 21 CFR Part 11 and full IQ/OQ support.

02

CLEAR FILM + PAPER BLISTER

Retail-grade clear+paper / trapped blister. Quick changeovers, chain/pallet handling, HSL paper cards, with vision inspection and coding options.

03

THERMOFORMING MACHINE

Rollstock form-fill-seal for food/medical/consumer. Modes: Vacuum / MAP / VSP. Hygienic stainless frame, servo indexing, tool-less die change.

04

CARTONING MACHINE

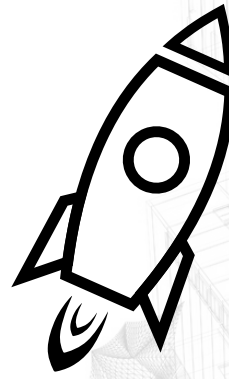

Auto erect-insert-leaflet-close (tuck or hot-melt) with vision/weight checks and serialization. Easy integration with upstream blister/flowpack.

YCH Group History

Ingoude
Company

Since 2010, YCH Group has advanced from local pharma projects to exporting 200+ blister systems—culminating in high-speed, Part 11-ready machines. Below is the path that got us here

2023
–
2024

Pallet-type blister & capacity expansion

Introduced pallet-index blister lines for lipstick and nasal inhalers.

Completed a new 3,200 m² manufacturing facility.

2013
–
2016

New models & markets

Launched the V16 pharma blister.

Engineered clear+paper blister lines for toothbrush packaging and thermoforming systems for medical devices.

20
10

Company founded

YCH Group established with one mission: **build Thailand's most trusted blister machines.**

High-speed & digital-ready

20
25

Released a high-speed blister platform, 21 CFR Part 11-ready with OEE/data logging, balcony frame and cleanroom-friendly design.

Specialty applications

2017
–
2021

Designed and built packaging lines for sutures, menthol nasal inhalers, and condoms.

First wave in Thailand

2010
–
2012

Delivered 20+ blister machines to Thai pharmaceutical plants; captured field data to develop the next-generation platform.
